PROFILE SUMMARY

Results-driven Data Analyst and Business Analytics professional with 3+ years of experience in Python, SQL, Power BI, and Machine Learning. Hands-on R&D experience in UI and systems engineering for unmanned systems at IABG mbH. Master's thesis on EU AI Act and Enterprise AI Governance, graded 93/100. IEEE-recognized ML researcher with strong foundations in predictive modeling, statistical analysis, and data engineering.

PROFESSIONAL EXPERIENCE

Working Student – Software & Systems Engineering (R&D)

IABG mbH | Munich, Germany | Sep 2024 – Mar 2026

Tech Stack: *Python, UI Development, Data Visualization, Systems Engineering, Simulation Data*

- Developed UI components for an operational suite used in mission planning of unmanned systems, improving visibility of system data and operational workflows.
- Built and refined frontend features supporting real-time system monitoring, data interpretation, and operational dashboards for unmanned systems.
- Integrated UI components with backend simulation data sources and system logic in collaboration with backend and systems engineering teams.
- Analyzed UI behavior and system interactions to identify issues, understand data patterns, and support troubleshooting.
- Documented workflows, data interactions, and component behavior to ensure maintainability and knowledge transfer across teams.

Master's Thesis – EU AI Act Impact on AI Governance & Enterprise Architecture

IABG mbH | Munich, Germany | Sep 2025 – Mar 2026

Tech Stack: *EU AI Act, AI Governance, Enterprise Architecture, TOGAF, NAF, SparX EA, Compliance Standards*

- Analyzed an enterprise architecture artifact of an AI Governance model to identify structural and procedural changes required by the introduction of the EU AI Act; achieved a thesis grade of 93%.
- Identified and evaluated relevant standards for introducing, operating, and managing AI applications, assessing how these standards evolve under the new regulation.
- Assessed three major regulatory impacts: (1) AI applications classified as legal products triggering product liability obligations; (2) shared responsibility between AI providers and operating companies due to model evolution; (3) reverse burden of proof (Beweislastumkehr) requiring stronger governance and risk controls.
- Gained hands-on experience with enterprise architecture modeling using SparX EA and frameworks including TOGAF and NATO Architecture Framework (NAF).

Software Engineer – Data & Application Focus

Brillio Technologies | Bangalore, India | Oct 2022 – Jan 2024

Tech Stack: *Java, REST APIs, SQL, Git, Microservices, API Performance Analytics, Data Modeling*

- Diagnosed API and microservices latency issues through in-depth performance data analysis, cutting system response time by 25%.
- Assessed application usage patterns and architectural metrics to strengthen scalability, boosting overall system capacity by 40%.
- Designed and delivered a data-driven Bank Management System ensuring data consistency, reliability, and maintainability across all modules.
- Gathered requirements, validated data models and flows, and ensured seamless service integration working closely with cross-functional teams.

ACADEMIC & RESEARCH EXPERIENCE

B.Tech Major Project – Machine Learning Research

IEEE Research Paper | India | Jan 2022 – Dec 2022

Tech Stack: *Python, Scikit-learn, Pandas, NumPy, Statistical Modeling, Feature Engineering*

- Conducted end-to-end data collection, preprocessing, and feature engineering to build ML predictive models for stress-level analysis across 500+ student records.
- Deployed classification algorithms achieving 89% model accuracy; findings documented and issued in a peer-reviewed IEEE research paper.

EDUCATION

MSc Business Analytics & Data Science
EU Business School | Munich, Germany | **Sep 2024 – Jun 2026**

B.Tech – Computer Science & Engineering
New Horizon College of Engineering | India | **Aug 2018 – Jun 2022**

PROJECTS

Power BI Sales & Profit Dashboard

Tools: Power BI, DAX, Excel, Data Modeling

- Built an interactive Power BI dashboard with DAX measures, drill-through filters, and automated refresh pipelines to analyze sales trends, profit margins, and regional performance.

Customer Churn Prediction – Machine Learning

Tools: Python, Scikit-learn, Pandas, NumPy, Matplotlib

- Developed a classification model using Python and Scikit-learn achieving 87% accuracy; performed feature engineering, hyperparameter tuning, and cross-validation.

TECHNICAL SKILLS

Programming: Python | SQL | MySQL | Java | Git | REST APIs | Bash
BI & Visualization: Power BI | Tableau | Excel Advanced | Google Data Studio
Machine Learning & AI: Scikit-learn | Regression | Classification | Clustering | NLP | Feature Engineering | Predictive Modeling | Statistical Modeling
Data Engineering: ETL Pipelines | Data Wrangling | Pandas | NumPy | Data Transformation | Linear Programming | MILP
AI Governance & EA: EU AI Act | TOGAF | NAF | SparX EA | Enterprise Architecture | Compliance | Risk Management
Cloud & Platforms: Google Cloud Platform (GCP) | SAP | Microsoft Azure | Agile | JIRA

CERTIFICATIONS

- **Microsoft Certified: Power BI Data Analyst Associate** – Microsoft (2026)
- **Google Cloud Digital Leader** – Google Cloud (2023)
- **SAP Backend Developer Certification** – SAP (2021)

WORK ELIGIBILITY

Eligible for full-time roles in Germany (Student Visa valid until 2026; Job Seeker Visa eligible)

LANGUAGES

English (C1 – Fluent) | German (A2 – Basic) | Hindi (Fluent) | Telugu (Native)
